Mid America Recycling Increases Capabilities With Addition of Machinex Unit

Mid America Recycling (midamericarecycling.com) is excited to announce the recent addition of the new Machinex 10 ton per hour Single Stream Machine.

The newest and most automated system in Lincoln, NE, this upgrade has effectively increased their production capabilities from 1 ton per hour to 10 tons per hour. Prior to the equipment being installed, Mid America Recycling was at capacity. Investment in this solution allows for additional Single Stream Volume, both residentially and commercially.

Mid America Recycling (MAR) began operations in 1979 in response to the passage of Iowa's Bottle Bill. Their professional management, plant, and administrative teams have more than 200 years of combined recycling industry experience. MAR makes the process of recycling materials quick and easy, managing your resources so you can manage your business. Areas of expertise include: Deposit Container Recycling, Comprehensive, Multi-Material Recycling, Commercial & Residential Single Stream Recycling, Specialized Recycling Equipment, and Waste Audits & Recycling Training. Please note: Mid America Recycling is not a waste hauler. Please contact your preferred Waste and Recycling provider for this service.

For more information about **Mid America Recycling**, please visit midamericarecycling.com or contact Kelley McReynolds at (402) 476- 8502 / kelleym@midamericarecycling.com.
